

## AlliSport Ltd TD5 Wire-In Tuning Modules Fitting Instructions

### **1999 - 2002**

Defender - ECU under drivers seat  
Discovery - in battery/jack compartment

- Disconnect RED plug from ECU.
- Connect the 5 YELLOW wires of the module to the 5 YELLOW wires at one end of the ECU plug. (No particular order required).  
The yellow wires at the ECU may also have a coloured trace.
- Connect the BLACK wire to a good earth.
- Connect the RED wire to ignition or permanent 12v positive

### **2002 - 2006**

See above for ECU locations and follow instructions.

Note that these later cars will have a yellow/trace colour but locations are the same.
